

**Investor Meet
Singapore
28th Feb & 1st Mar 2023**

Disclaimer

This presentation has been prepared solely for use at the investor/analyst presentation. By attending the meeting where this presentation is made, or by reading the presentation slides, you agree to be bound by the following limitations:

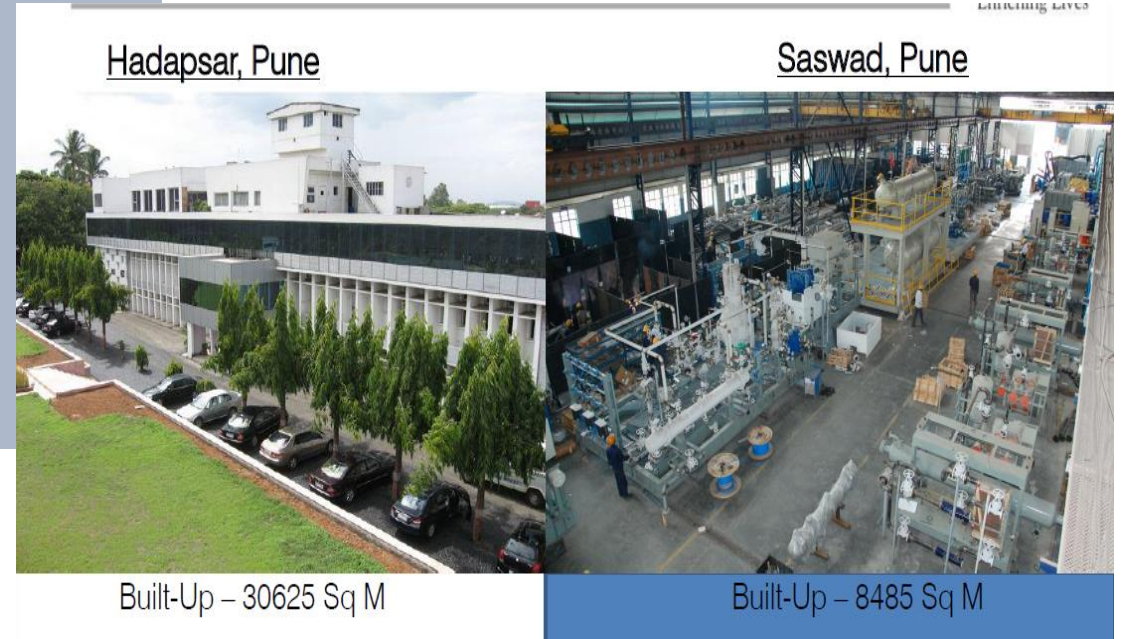

Statements in this presentation, particularly those which relate to management's views and analysis, describing the Company's objectives, projections, estimates and expectations may constitute "forward looking statements" within the meaning of applicable laws and regulations. Actual results may differ materially from those anticipated in the forward-looking statements. The company assumes no obligation to update forward-looking statements to reflect actual results, changed assumptions or other factors.

Kirloskar Pneumatic Company Ltd:

Three core business lines:

- Air Compressors
- Refrigeration Compressors & compression systems.
- Gas compressors & compression systems.
- Others

- 60 plus years in business.
- Debt free; strong dividend track record.
- 3 plants in Maharashtra; workforce of over 1500. Over 200 engineers .
- Strongly vertically integrated manufacture.
- Listed company with over 28K shareholders. Market cap: > Rs 3400 cr.
- Our current sales split is ~ 20% Air compressor; ~ 30 % Refrigeration compressors
~ 45% Gas compressor s/ systems

Air compressor:

General applications like shop air, instrumentation air,
Painting, powertools, pneumatic drills, cleaning, packing etc

Also used in applications like: Air separation, handling hydrogen,
CO₂, Nitrogen, LPG, etc. Process gases like BF₄, Methyl acetate etc

Screw compressors.

Generally 70% of the market; standard applications; efficient;
Preferred for lower pressures (< 15 bar), continuous usage.

Reciprocating compressors.

Generally 20% of the market; special applications; customised;
Preferred for Higher pressures (upto 300 bar), process usage.

Centrifugal compressors.

Generally 10% of the market; High volume applications; efficient;
Preferred for lower pressures (< 30 bar), continuous usage.

Reciprocating Compressors

- ❖ **Segments where used:**
 - Oil & Gas, Chemical
 - Pharma, Food & beverage
 - Air – Separation, High Pressures
 - Railways – braking.

Centrifugal Compressors

- ❖ **Segments:**
 - Used in Steel, Power, Textile, Oil & gas.
 - Also used as an alternate to Dry Screw

Range of Screw Compressors: *Many applications....*

R3e Series, 30 kW To 55 kW

Shop air, instrumentation

R2 Series, 15 kW To 22 kW

Utility – power tools, painting etc

R1 Series, 7 kW To 11 kW

General Utility

❖ **Key Industries :**

- Core: Cement, Metals industry, power generation
- Engineering: Auto ancillary, textile, sugar, plastics, packaging & grain sorting.

INDIGENOUS AIREND AND ECONOMICAL PACKAGES

Air compressor:

Global market size : ~ US \$ 30 Bil

Indian market : > Rs 4000 crores.

Lead indicator : GDP +

Technological change / obsolescence – Low.

Nature of industry: ‘Local’ – need to be present locally to sell / service this.

Very fragmented.

What is KPCL's position:

- Full range of offering; more contemporary - late entrant in the Screw / Centri business.
- End – to – end value chain integrated manufacturer - right from design.
- Current focus : Indian market.
- Very strong after-sales service support.
- Leader in customised packages – strong engineering team.

Going forward:

- **New cost competitive standard offering .**

Refrigeration compressor / Compression system:

Process refrigeration

Here we offer Refrigeration packages for various processes in Oil & Gas sector, fertiliser, petrochemicals. We currently use Howden Screw compressors for this

Commercial Refrigeration.

We are a leading manufacturer of Air cooled, Ammonia refrigerant Based reciprocating compressors used in Cold rooms, Ice plants, Food processing, dairies, pharma etc. We have now launched the Khione screw to strengthen our position In this space and to meet the requirement of larger plants.

Comfort airconditioning.

Here we make specific packages for HVAC for Ships – mainly the Navy.

In addition to the above, we make Vapour Absorption Chillers that is used where process Steam or hot water is available . Primarily for cooling upto 10 deg.

Refrigeration & Air conditioning:

The global market for R&Ac compressors is about US\$ 34 bil.

Trend driving growth : Urbanisation.

Lead indicator: GDP +

Nature of business: 'Global' – can make at any place and sell across the world.

Technological changes / obsolescence: Medium – in refrigerants, energy etc.

KPCL's position:

- Leadership in ammonia reciprocating compressor – cost competitiveness / volume.
- Strong engineering / packaging capabilities – for process refrigeration.
- Good distribution / OEM tie-ups in India / SEA – spares / service.

Going forward:

- New Mag bearing compressors
- Cost effective Screw compressor – Khione range

Process Gas Systems Business

GAS COMPRESSION SYSTEMS
UPSTREAM, MIDSTREAM, DOWNSTREAM

DISTRIBUTION
CNG, CBG, BOOSTER

SERVICE & SPARES

Gas compression systems:

CNG gas package

This is based on our own reciprocating compressor. Used to fill Natural Gas into vehicles from CNG pipelines. We sell, install and handle the O & M of these.

Gas packages

These are packages used in Upstream, mid stream and down stream of the O & G ecosystems. We make packages using Ariel compressors in most cases. Primarily for gas gathering, gas processing, gas pumping and gas injection etc.

Booster gas package

These are engineered and built by us for use in filling Vehicles from gas cascades at gas stations.

Bio gas package

We offer standardised low pressure + High pressure compressor packages for handling biogas from both routes – water scrubbed or membrane separated. These are reciprocating compressors Built by us.

CNG Hydraulic
Booster compressor:
*Best in class
offering.*

COMPRESSED BIOGAS

- 5000 CBG Plants expected in 3 years under SATAT scheme to produce 15MMT CBG
- Oil & Gas Companies are entering into MoU with Sate Government for facilitating CBG Plants

Gas compression system:

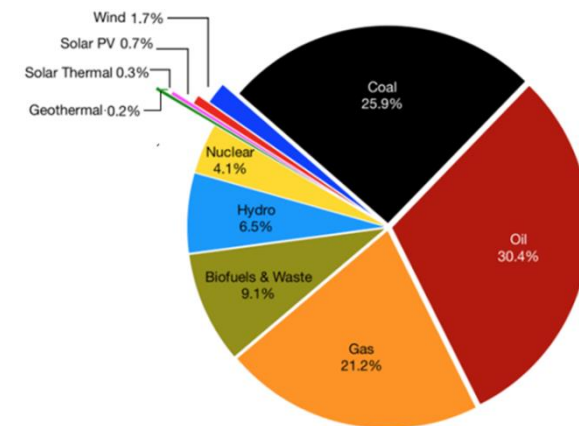

The market size for gas compressors is about US\$ 4,7 Bil and for the gas compression systems is about US\$ 24 Bil.

Nature of business: Global – based on Proven Track Record – PTR.

Entry barrier : API or other certifications.

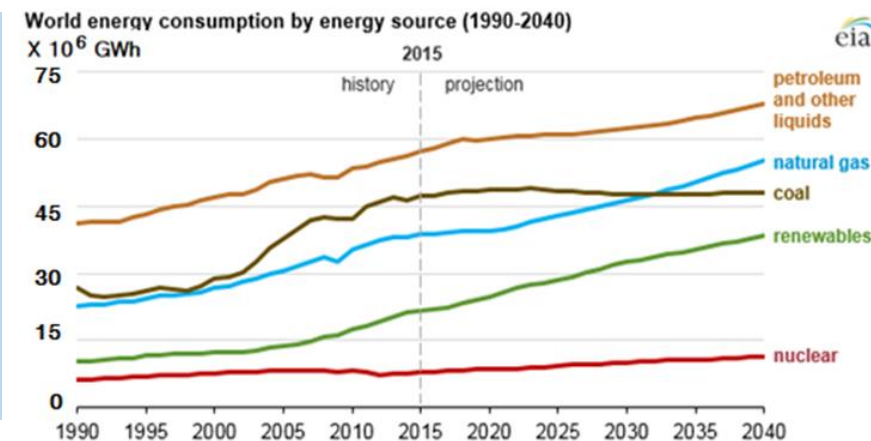

Global trend : Gasification of the energy basket; Environmental initiatives.

Lead indicator: Industrial growth rate +

KPCL's position:

- Strong Design & Engineering capability – own compressors for most applications.
- PTR; approvals
- O & M capabilities for the Indian market.

Going forward:

> Working on Hydrogen compressor – unique / cost effective

Value chain advantages:

At KPCL we have the following capabilities in house giving us value chain advantage:

- Foundry – for CI, SG Iron and Aluminum alloys.
 - 32 Ton Counterblow hammer – one of its kind forging capacity to make Gear blanks, Rotors, etc.
 - Comprehensive fabrication facility – for base frames, pressure vessels etc.
 - High precision multi axis CNC machining capability – for housings, Impellers, Rotors, Screws etc.
 - Design & Engineering capabilities – over a 100 engineers in D&E with advanced software support, including a PLM.
- > Over 1200 associates across 15 states of India managing the O & M of all the CNG stations.

Kirloskar Pneumatic's Rewards & Recognition Programme

Rewards and Recognitions (R&R) have a significant impact on employee engagement. Keeping this in mind, KPCL sought to improve its existing employee recognition programmes and to introduce new ones. The company implemented its new reward & recognition strategy in three steps - design, communicate and implement. Under design, the company prepared reward scheme posters and displayed them at key locations and on the intranet to create awareness among employees. It also introduced a non-monetary 'Thank You' card. Under communicate, the company created an R&R logo for branding and recall. The company also initiated a few changes in its R&R policy, such as making trainees eligible for R&R, same reward amount irrespective of designation, standardization of trophies and sending names of all awardees via email and also on the intranet every month. The new R&R policy also recognises CSR volunteers by awarding them certificates and gifts.

Performance Management

Kirloskar Pneumatic's New Appraisal Process for Performance Management

Performance management is the set of activities that help employees as well the organisation in meeting their goals in an effective and efficient manner. Kirloskar Pneumatic aimed at improving its erstwhile performance appraisal system and introducing a new one in order to enhance its performance management. Hence, the company worked on a new performance appraisals process. The new appraisal process involved few changes like online oracle system for appraisals, keeping track of employee's performance history made easy, inclusion of subordinates' development activities in performance appraisal for managers, training on effective performance appraisal for managers, team working made part of performance appraisal, system alerts for pending appraisals and timely completion of performance appraisals. The new appraisal process has helped the company in timely completion of employees' performance appraisals.
